## A Message To The Trade ★ ★ ★

The bulb situation—both foreign and domestic—is at this time extremely unsettled. Weather conditions here and abroad have been most unfavorable. From all accounts there will be a shorter crop of almost all Dutch items—Hyacinths, Tulips, Iris, etc., than in many years. As a result, prices have been considerably advanced, even on early placed orders. As some items will definitely be short, may we suggest when ordering, that you permit us to substitute if necessary with the nearest size and/or nearest similar variety to that which you may want. If prices at time of delivery are lower than those listed, you will be given the benefit, if higher, you will be advised prior to shipment.

LILIES: The crop in the South is extremely limited. Therefore, we strongly advise ordering *CROFT* for Easter—there is no better—Estate for cut. These are both from the Pacific Northwest—the finest Lily growing section in the United States.

We have appreciated your confidence in the past fifty years—we shall continue to make every effort to warrant it in the future.

President

*Sidney H. Skidelsky*

**HARDY LILIES****DELIVERIES FROM LATE FALL ON**

Plant bulbs immediately on arrival in a well drained soil, giving them plenty of opportunity for root action. The containers should then be set on a raised platform in a cool, semi-dark place, affording perfect drainage. When flower buds appear, the plants will then readily submit to forcing. They may also be planted out of doors for flowering in June and early July and later.
